

A close-up, low-angle shot of the backrest of a chair. The chair is upholstered in a mustard yellow fabric with a prominent, coarse woven texture. The backrest is curved and tapers towards the top. The lighting is soft, highlighting the texture of the fabric. The background is a plain, light color.

WELL-COME

Diemme Lab / 2024

WELL-COME stands out by virtue of its soft and generous shapes that welcome the user whether working, resting, meeting or waiting. With its distinctive sculptured profile, WELL-COME was created with the intention of being fully included in any setting. The shell and fixed base are fully upholstered. The shell is also available with a black metal 4-spoke swivel base. WELL-COME is the ideal choice for anyone looking for a piece of quality furniture that combines style and comfort. The fully covered version, made entirely of polyurethane, transforms the idea of durability and end of product life. Its design features and construction material allow replacement of the flexible parts, including the coverings, thus giving new life to the product.
